SKILLS

BI & Visualisation: Power BI (DAX, Star Schema, Power Query) | Tableau | Dashboard Development

Data & Databases: SQL | PostgreSQL | Data Modelling | Data Cleaning & Validation | EDA

Python & ML: Python (Pandas, NumPy, Scikit-learn, XGBoost, MLflow, Streamlit)

Analytics: KPI & SLA Reporting | Root Cause Analysis | Business Intelligence | Storytelling with Data

Operations: Advanced Excel | Stakeholder Reporting | Process Improvement | Git & GitHub

WORK EXPERIENCE

Data Analyst Intern | Labmentix | Bengaluru

Apr 2026 – Present

- Delivered 4 end-to-end analytics projects across SQL, Power BI, Python/ML, and Excel, building client-ready BI solutions in aviation, retail, and real estate domains.
- Built the U.S. Airline Performance & Delay Analysis solution on 1M+ flight records using PostgreSQL and Power BI, developing KPI-driven SQL views, interactive dashboards, and a business insights report identifying carrier delays as 31% of total delay minutes while weather contributed only 5.44%.
- Developed the Dubai Real Estate Intelligence Dashboard in Power BI using a 50,000-row housing dataset, implementing DAX-based pricing metrics, property segmentation, and investment-focused reporting dashboards.
- Created the Real Estate Investment Advisor using Python, XGBoost, MLflow, and Streamlit to classify investment-worthy properties and forecast 5-year prices on 250,000 housing records, deployed as a live production app.
- Built the Retail Sales & Inventory Intelligence System by designing a 9-table PostgreSQL database, analytical SQL queries, and Power BI dashboards that identified Baldwin Bikes contributing 67% of revenue while exposing 39% delayed or unshipped orders.

Client Servicing Manager | Xarm Experiential | Bengaluru

Jul 2024 – Aug 2025

- Managed operational performance across 8–10 concurrent live events by developing Excel-based reporting and tracking systems for budgets, vendor milestones, and client deliverables, achieving zero missed client SLAs over 14 months.
- Analysed project risks and operational bottlenecks through weekly ops reviews and escalation tracking, enabling issue resolution 48+ hours before deadlines and eliminating last-minute escalations.
- Tracked budgets ranging from ₹10–25 lakh per project using structured reporting frameworks, ensuring 100% on-budget delivery across the full 14-month tenure.

Subject Matter Expert | First American India | Bengaluru

Dec 2021 – Jun 2024

- Maintained 100% SLA compliance throughout a 2.5-year tenure by overseeing quality assurance, performance reporting, and title and settlement record processing operations.
- Designed Excel-based KPI and SLA scorecards tracking 5+ performance metrics across a 10+ member team, enabling weekly root cause analysis that reduced recurring error categories within two quarters.
- Trained and mentored 20+ associates on process standards, quality controls, and performance metrics, driving measurable accuracy improvements and adoption of the scorecard framework across the broader operations team.

Senior Process Associate / Process Associate | First American India | Bengaluru

Jan 2018 – Nov 2021

- Processed and validated 100+ title and settlement records daily while maintaining accuracy above team benchmarks, supporting consistent SLA performance and quality standards.
- Built Excel-based performance trackers to analyse output, turnaround time (TAT), and error rates, leveraging data to identify improvement opportunities and maintain SLA compliance.
- Promoted from Process Associate to Senior Process Associate within 2 years, recognised for consistent accuracy, process ownership, and a self-driven approach to performance tracking.

PROJECTS

U.S. Airline Performance & Delay Analysis | PostgreSQL, SQL, Power BI, DAX

Jun 2026

[GitHub](#) | [Portfolio](#)

- Analysed 1M+ U.S. domestic flight records in PostgreSQL — built a cleaned view filtering 43,071 cancelled and diverted flights, and developed 6 KPI views using window functions, aggregations, and RANK() OVER to measure on-time performance, cancellation rates, and delay causes across 14 airlines and 315 airports.
- Built a 3-page Power BI dashboard with DAX measures, conditional RAG formatting, and a geographic congestion map — surfacing that weather accounts for only 5.44% of delays while carrier and late aircraft issues drive nearly 70%, with a 23-point OTP gap between the best and worst airline.

Retail Sales & Inventory Intelligence System | *PostgreSQL, SQL, Power BI, DAX, Excel* Jun 2026

[GitHub](#)

- Designed a 9-table PostgreSQL relational database and wrote 10 analytical SQL queries with 4 reusable views to analyse sales performance, inventory status, staff output, and shipment health across 3 stores and 1,600+ orders for a bicycle retail company.
- Built a 3-page Power BI dashboard with DAX measures and interactive slicers revealing that Baldwin Bikes drives 67% of total revenue (\$5.2M of \$7.69M) while 39% of all orders are delayed or unshipped, concentrated in high-value Mountain and Road Bike categories.

Real Estate Investment Advisor | *Python, Scikit-learn, XGBoost, MLflow, Streamlit* Apr 2026

[Live App](#) | [GitHub](#)

- Built an end-to-end ML pipeline on 250,000 Indian housing records to classify investment-worthy properties and forecast 5-year property prices using Scikit-learn, Random Forest, and XGBoost models with MLflow experiment tracking.
- Engineered features including Infrastructure Score, Floor Ratio, and Price Segment; implemented preprocessing, encoding, scaling, and class balancing techniques; deployed as a live Streamlit app with investment recommendations and confidence scoring.

KPI & SLA Operations Dashboard | *Power BI, DAX, PostgreSQL, Star Schema* Mar 2026

[GitHub](#)

- Built an end-to-end operational analytics dashboard tracking KPIs and SLA compliance across 10,000+ records; extracted data from PostgreSQL, modelled using a star schema, and built three interactive Power BI pages with DAX measures for breach rates and trend analysis.
- Directly replicates the SLA reporting work done at First American India — demonstrating how 7 years of operational experience translates into a production-ready BI solution built from the ground up.

CERTIFICATIONS

Deloitte Australia — Data Analytics Job Simulation May 2026

Forge — practical tasks in data analysis and forensic technology.

Tata Group — Data Visualisation Job Simulation April 2026

Forge — executive question framing, chart selection, four visuals in Tableau Public, and a 5-minute client presentation.

Accenture Australia — Technology Consulting Job Simulation April 2026

Forge — modular design, process flow diagrams, and agile user stories across four epics.

EDUCATION

Certified Data Analyst — SkilloVilla April 2026
