SKILLS

Power BI (DAX, Star Schema), SQL / PostgreSQL, Tableau, Python (Pandas, NumPy), Advanced Excel, Data Cleaning & Validation, KPI & SLA Reporting, Data Modelling, Data Visualisation, Structured Problem Solving, Business Storytelling.

WORK EXPERIENCE

Client Servicing & Operations Manager — Xarm Experiential, Bengaluru *July 2024 – August 2025*

- Managed end-to-end client servicing and operations across 8–10 simultaneous live experiential events across multiple cities, overseeing project execution from planning to delivery.
- Built and maintained structured Excel-based trackers covering budgets, vendor milestones, and client deliverables; conducted weekly ops reviews that reduced last-minute escalations by ensuring risks were flagged and resolved at least 48 hours in advance.
- Delivered 100% of projects within budget across 10–25 lakh per-project budgets with zero missed client SLAs throughout a 14-month tenure.
- Streamlined cross-functional coordination between 3+ internal teams per event, cutting average response time on vendor issues by standardising escalation protocols.

Subject Matter Expert — First American India, Bengaluru *December 2021 – June 2024*

- Owned quality oversight and SLA reporting for a team of 10+ associates processing title and settlement records, ensuring accuracy and compliance with turnaround times across all shifts.
- Designed KPI and SLA scorecards in Excel tracking 5+ key metrics per associate, including accuracy rate, turnaround time, and volume throughput; conducted weekly root cause analysis on error patterns.
- Trained and mentored 20+ junior associates on process standards and documentation, contributing to a measurable reduction in recurring error categories within 2 quarters of coaching rollout.
- Scorecard framework adopted as the standard reporting tool across the broader operations team, maintaining 100% SLA compliance with zero breach instances logged over the 2.5-year tenure.

Senior Process Associate / Process Associate — First American India, Bengaluru *January 2018 – November 2021*

- Processed and validated 100+ titles and settlement records daily against compliance standards, maintaining accuracy rates above the team benchmark across a 4-year tenure.
- Built and maintained personal Excel-based performance tracking sheets monitoring daily output, turnaround time, and error rate; used data to self-correct and consistently stay within SLA thresholds.
- Proactively flagged and resolved discrepancies in coordination with senior associates, reducing rework instances and contributing to smoother team throughput.
- Progressed from Process Associate to Senior Process Associate in 2 years, then to Subject Matter Expert — a 3-tier promotion driven by consistent above-benchmark output across 6.5 years.

PROJECTS

[Real Estate Investment Advisor](#) *Python, Scikit-learn, XGBoost, MLflow, Streamlit* | [Live App →](#)

- Built an end-to-end ML pipeline on 250,000 Indian housing records to classify properties as good investments (99.73% accuracy) and forecast 5-year prices ($R^2 = 0.9999$) using Random Forest and XGBoost models.
- Engineered 5 new features including Infrastructure Score, Floor Ratio, and Price Segment; handled encoding, scaling, and class balancing before model training; tracked all experiments in MLflow.
- Deployed a live Streamlit web app enabling real-time property analysis with investment verdict, confidence score, and 5-year price forecast — accessible at rajukumar31.github.io.

[KPI & SLA Operations Dashboard](#) *Power BI, DAX, PostgreSQL, Star Schema, Data Modelling*

- Built an end-to-end operational analytics dashboard tracking KPIs and SLA compliance across 10,000+ records, enabling managers to identify bottlenecks and monitor team performance in real time.

- Extracted and cleaned raw operational data from PostgreSQL, modelled it using a star schema with fact and dimension tables, and built three interactive dashboard pages in Power BI using DAX measures for KPI scoring, SLA breach rates, and period-over-period trend analysis.
- Delivered a fully functional multi-page dashboard surfacing SLA breaches and underperforming KPIs at a glance — reducing manual reporting effort and providing a structured foundation for data-driven operational decisions.

ShopNest Executive Sales Dashboard *Power BI, DAX, Excel, Data Cleaning, Sales Analytics*

- Consolidated \$15.7M in revenue and 97,000+ orders into a single interactive executive dashboard to support leadership decision-making across a retail business.
- Cleaned and structured raw sales data in Excel, built a Power BI model with DAX measures covering revenue, order volume, delay rates, and product-level performance; designed a clean executive layout with drill-down filters by region, category, and time period.
- Produced a polished dashboard highlighting a 0.05% order delay rate as a key efficiency metric — giving leadership clear visibility into sales trends, top-performing products, and operational performance across the business.

Airbnb NYC Market Analysis Dashboard *Tableau, Data Cleaning, Exploratory Data Analysis, Geospatial Visualisation*

- Analysed the New York City Airbnb market across 5 boroughs using 30,478 listings and 366,307 reviews to uncover pricing trends, host concentration, and neighbourhood-level demand patterns.
- Cleaned and restructured the dataset into four analytical sheets, then built interactive Tableau visualisations including a geographic map, price distribution scatter plot, and borough comparison charts.
- Delivered a multi-view Tableau dashboard exposing clear pricing disparities across boroughs, high-review host clusters, and demand signals — providing a practical analytical framework applicable to hospitality and real estate use cases.

Online Retail Revenue & Customer Insights Dashboard *Tableau Public, Business Storytelling, Customer Analytics*

- Translated 541,000+ transactions across 38 countries from the UCI Online Retail dataset into four targeted executive visuals answering CEO and CMO-level questions on revenue trends, geographic demand, and customer value.
- Built and published a Tableau Public dashboard with a monthly revenue line chart, top 10 revenue-generating countries, top 10 customers by revenue, and a global demand map — part of the Tata Data Visualisation Virtual Experience (Forge, April 2026).
- Published a live, publicly accessible dashboard demonstrating business storytelling and data visualisation best practices; delivered findings in a recorded 5-minute presentation simulating a real client-facing analyst engagement.

CERTIFICATIONS & VIRTUAL EXPERIENCE

Tata Data Visualisation: Empowering Business with Effective Insights

April 2026

- Forge Virtual Experience — completed all four tasks, including framing executive questions, chart selection, building four visuals in Power BI and Tableau Public, and a 5-minute presentation.

Accenture Australia Technology Consulting

April 2026

- Forge Virtual Experience — completed technology consulting and agile tasks, including modular design, process flow diagrams, and agile user stories across four epics.

Deloitte Australia Data Analytics Job Simulation

May 2026

- Forge Virtual Experience — completed practical tasks in data analysis and forensic technology.

ACADEMICS

Data Analyst — SkilloVilla | Accredited by FutureSkills (Nasscom) & Wipro

April 2026

B. Com in Finance — Dayananda Sagar Institutions, Bengaluru

2014–17
